Great accumulation capacity.

The extraordinary efficiency of the combustion chamber of Hoxter insert, completely covered by refractory, combined with the excellent performance of Durasic® accumulation rings, provides the maximum accumulation capacity in the smallest possible space. Thanks to its thermal performance, **Armonia** is on the same level of tiled stoves, a unique product in the current accumulation branch.

Even more accumulation with **DURASIC®**

The kit of **Durasic®** plates allows our stove Armonia a further increase of accumulation and a gradual heat release. Durasic® is an innovative material, based on silicon carbide and fireclay, developed in our company laboratory. A certified product with an excellent performance.

Highest efficiency, environmental sustainability and saving.

“**Smart Fire**” is the electronic system by Cerampiù that allows to optimise the wood combustion process. A correct supply of combustion air is provided, in relation to the temperature in the combustion chamber. In this way emissions and consumption are even more reduced, by achieving the highest efficiency.

Armonia is completely built with high thermal accumulation materials. All the heat produced by the combustion is direct to the Durasic® flue gas system and gradually released in the room by irradiation, thanks to the precious tiles in the 4 sides. This system ensures autonomy in heat distribution, more than 8 hours with only one wood load!

Ecology, environmental sustainability.

Wood is one of the most important renewable heat sources we currently have. In Cerampiù we care a lot about environmental protection. For this reason all our stoves are built to meet the highest standard of efficiency and minimize emissions.

ARMONIA ... of precious handcrafted tiles.

Earth, water, air, fire: the precious tiles of our stoves **Armonia** originate from these basic elements, a combination based on clay and water to obtain a natural mixture which is poured into special plaster moulds. After opening these moulds, tiles are hand-finished and placed on specific shelves to get dry. Tiles are then ready for firing in oven at a temperature above 1000°C.

A real work of art...

Decorations and engravings are completely hand-made by our decorators who create unique and original pieces, according to the aesthetic needs of stove. Tile glazing allows to customise your stove, by choosing from our wide range of glazes.

100% Made in Italy.

A quality guarantee for a longlasting product, an added value for a precious item, custom-made to meet your wish and therefore unique.

ARMONIA

ARMONIA

Vega

Armonia Vega	
Rated heat output	24 kW
Efficiency	90,8%
CO emission at 13% of oxygen	0,05%
Fuel	wood
Quantity of wood per load	6 Kg
Smoke temperature	181° C
Smoke volume	20 g/s
Smoke exhaust	Ø 180 mm
Required draft	12 Pa
Air intake connector	Ø 150 mm
Weight insert	158 Kg
Weight Armonia Vega	535 Kg
Energy class	A+
Heat accumulation	 8 h
Smart Fire	 ✓

ARMONIA

Regina

Armonia Regina	
Rated heat output	24 kW
Efficiency	90,8%
CO emission at 13% of oxygen	0,05%
Fuel	wood
Quantity of wood per load	6 Kg
Smoke temperature	181° C
Smoke volume	20 g/s
Smoke exhaust	Ø 180 mm
Required draft	12 Pa
Air intake connector	Ø 150 mm
Weight insert	158 Kg
Weight Armonia Regina	522 Kg
Energy class	A+
Heat accumulation	 8 h
Smart Fire	 ✓
